Art Unit: 3765

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-32, 44-48, 73 and 74, drawn to a system for endscopic suturing, classified in class 606, subclass 144.
- II. Claims 33, 34, 40-43, 49, 50, 54-71 are drawn to a method for suturing and suture instrument, classified in class 606, subclass 139.
- III. Claims 35-39 and 51, drawn to an attachment for endoscopes, classified in class 606, subclass 139.

The inventions are distinct, each from the other because of the following reasons:Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, inventions I, II, and II have separate utility as the system of Group I do not require the elements of Group II or III; the suture instruments of Group II do not require the elements of Group I or III; and endoscopic attachements of Group III do not require the elements of Group I or II. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 3765

This application contains claims directed to the following patentably distinct species of the claimed invention:

Claims 40-42 drawn to a suture instrument with one or more needles

Claim 43, drawn to a suture instrument at least partially flexible

Claims 54-63, drawn to a suture instrument with one or more needles, with a tissue engaging portion and cavity and suction means

Claims 64-65, drawn to a suture instrument with one or more needles and partially flexible.

Claims 66-67, drawn to a suture instrument with a suture channel, a plurality of tracks and layers.

Claim 68, drawn to a suture instrument with a housing, a chamber, and a cylinder.

Claims 69-71, drawn to a suture instrument with a housing, a chamber, and a piston.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Art Unit: 3765

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to Kenneth LuKacher on 11/03/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Art Unit: 3765

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert H Muromoto, Jr. whose telephone number is 703-306-5503. The examiner can normally be reached on 8-530, M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Calvert can be reached on 703-305-1025. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0861.
